EDUCATION

- | | |
|--|----------------------------|
| Singapore Management University, Singapore
PhD in Computer Science, Supervisor: Pradeep Varakantham <ul style="list-style-type: none">Presidential Doctoral Fellowship for 2023 and 2024 | Aug 2020 - Mar 2025 |
| University of Southern California, USA
MSc in Electrical Engineering, GPA 3.6/4.0 | Aug 2018 - May 2020 |
| China Jiliang University, China
BEng in Opto-electronics Information Science and Engineering, GPA 3.7/4.0 <ul style="list-style-type: none">Excellent Graduate; 1st Class Scholarship for Academic Excellence | Sep 2014 - Jun 2018 |

Work Experience

- | | |
|---|----------------------------|
| Ant Group – Hangzhou, China | Mar 2026 - present |
| LLM Researcher <ul style="list-style-type: none">Curate and analyze code-oriented post-training data, identifying data-quality gaps and refining training recipes to improve LLM coding performance. | |
| Huawei Noah's Ark Lab – Singapore | Aug 2024 - Mar 2026 |
| AI Researcher (Mar 2025 – Mar 2026) <ul style="list-style-type: none">Contributed across the lifecycle of a deep-research agent, from method design and pipeline optimization to synthetic data generation, model training, evaluation, and deployment.Developed a hierarchical multi-agent LLM framework for long-horizon constrained planning; improved TravelPlanner test FPR to 52.6% (+8.7 pp over SOTA) and reduced latency by 2.5x via parallel day-level execution.Designed and optimized workflow and context-management pipelines for a PPT-generation agent, and supported agent post-training to improve task performance. | |
| Intern Researcher (Aug 2024 – Dec 2024) <ul style="list-style-type: none">Proposed a meta-cognition-based algorithm that estimates LLM uncertainty and guides adaptive decisions on when to use external tools. | |
